

Summer Internship Proposal

About Us

USICT ACM Student Chapter was launched in 2019 to promote the Computer Science culture in USICT. At USICT ACM Student Chapter, we see a world where computing helps solve tomorrow's problems, where we advance the profession and make a positive impact.

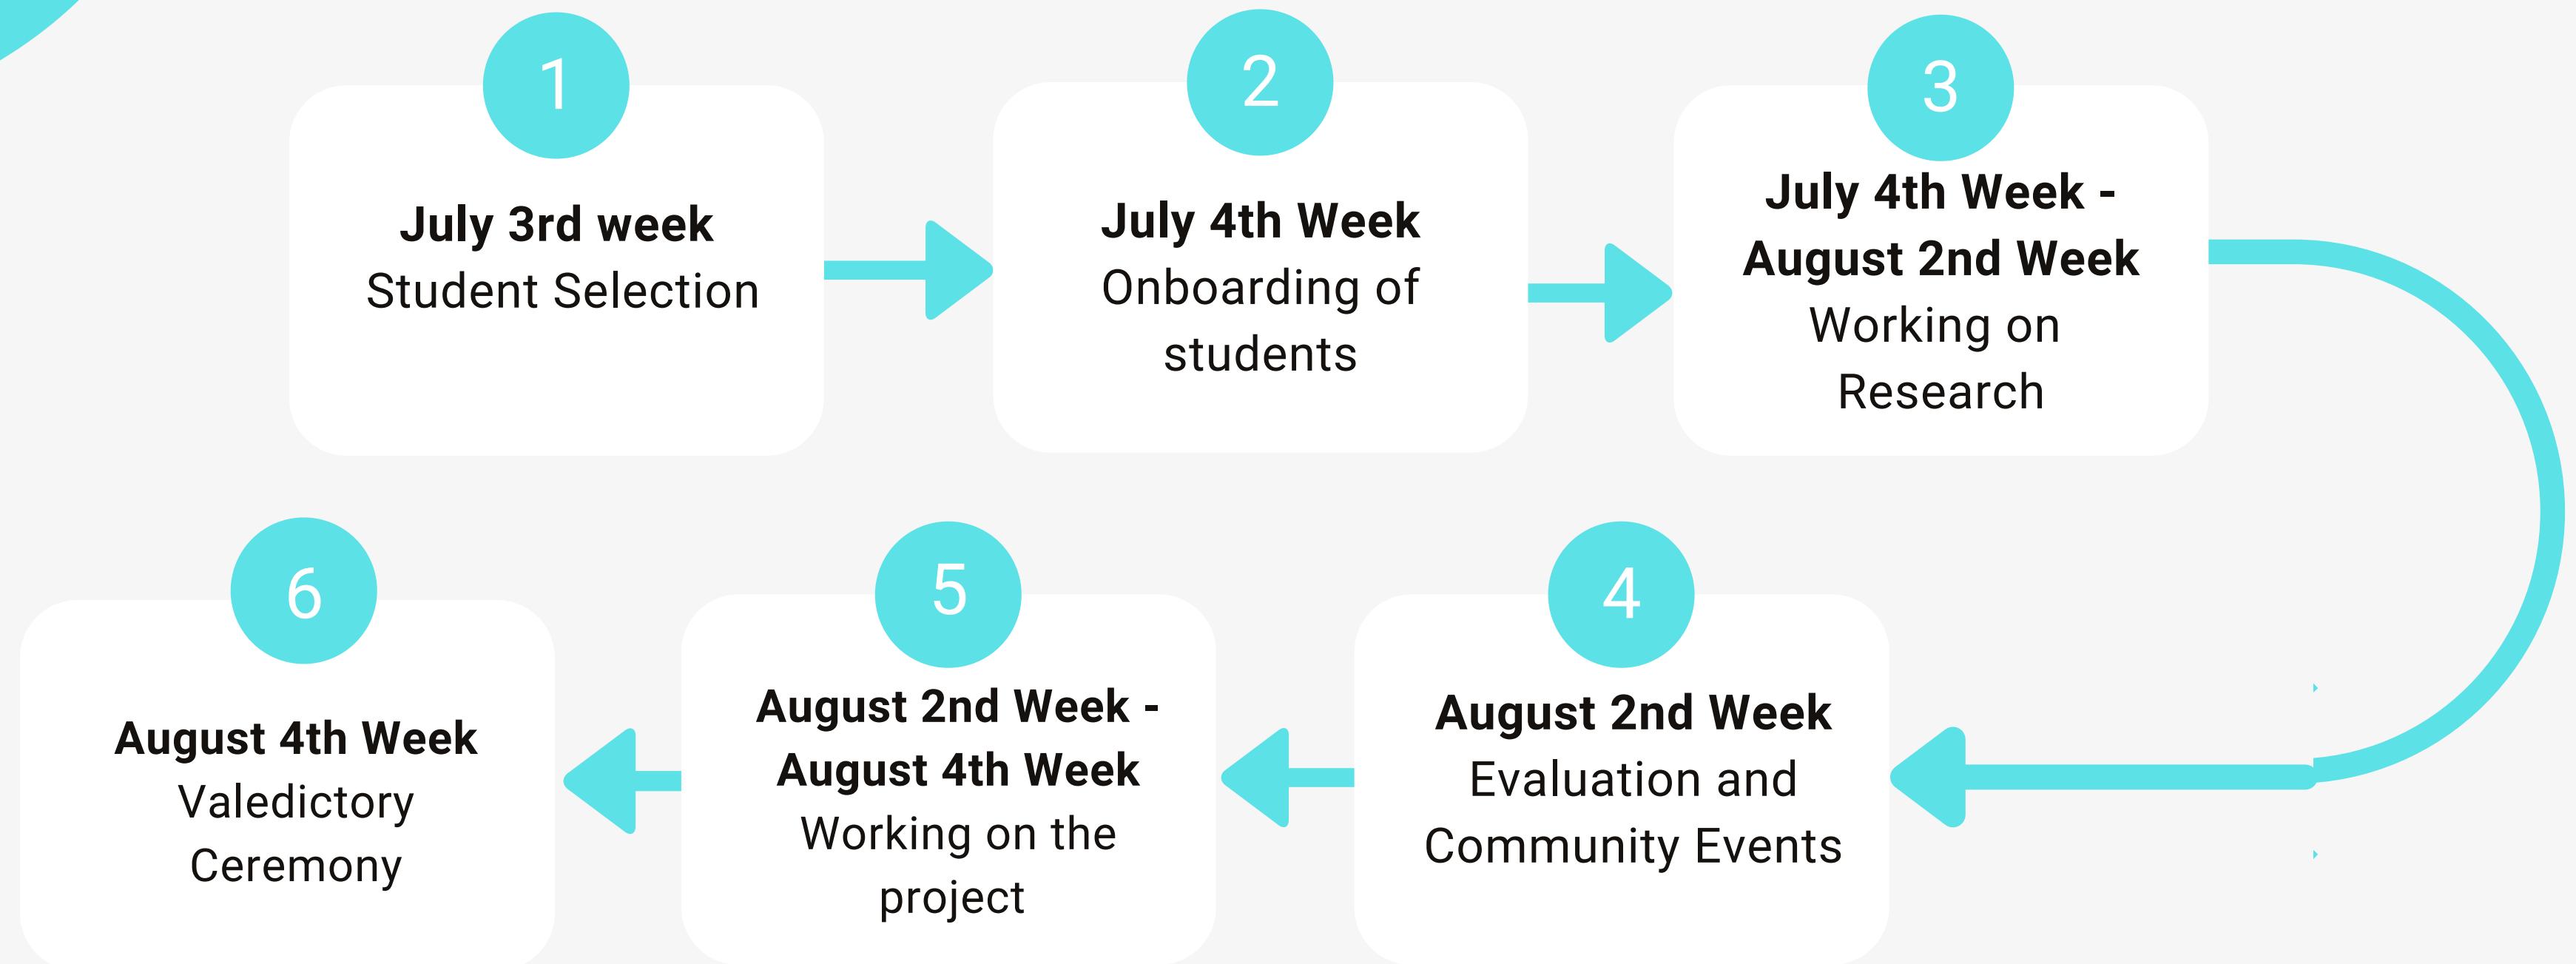

USICT ACM Student Chapter organizes various events, webinars, and workshops to enhance the computer and scientific knowledge among the students. We have conducted over 30 major events and multiple mini-events in the past year, with a growing network of more than 500 students.

About Event

USICT ACM Student Chapter is planning to provide a **summer internship to second and third-year students**. The internships will involve different **projects** under the **supervision of Professors**. This internship offers self-motivated students in-depth knowledge and exposure to work in advanced technology areas.

Roadmap

*This timeline is indicative and can be extended as per mutual understanding between student and teacher.

*There will be no financial assistance from the USICT ACM STUDENT CHAPTER.

Proposal Details

Student Selection

- Releasing forms for students.
- Selection of students based on projects.

Onboarding Week

- Introduction of the assigned project.
- Allocation of respective responsibilities in the project.

Working on the Research

- Students will work on the allocated part of the project.
- Evaluation by teachers to ensure that project is on track.

Evaluation and Community Events

- The first evaluation will be done.
- Community events will be held for students and teachers to participate.

Working on the Research

- Students will continue their work on the project.
- Those who complete will be awarded a certificate

Benefits

Faculty will get students who are willing to work under their wings and in their domain.

It will increase the bandwidth of the teacher as he/she will get connected to students giving more resources to complete the project.

Giving training to the students will also bring in more ideas from the students' side that can be used to improve the ongoing projects.

This will improve the overall culture of the college helping to boost the rankings of our college in prestigious frameworks like NIRF, NAAC, etc.

Innovative projects done in this period will help both students to improve their professional accomplishments.

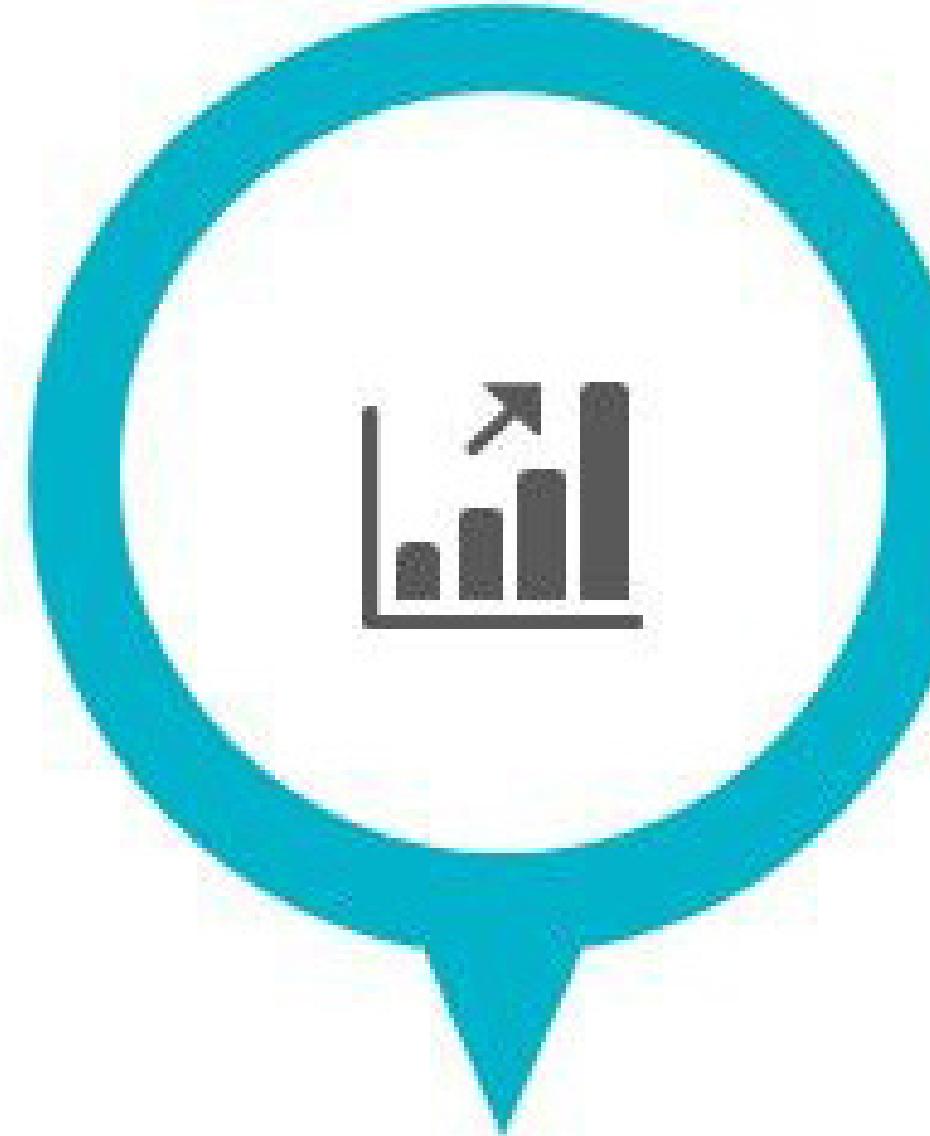

A more innovative culture will lead to more opportunities for both students and teachers in the upcoming future.

Expectations

Cooperation

Performance
Updates

Evaluation at the
end of program

Thank You!
